## Custom Cabs Industries under platform door operator

Custom Cabs Inc. has a proprietary door operator design that will please the most demanding Architects and Designers called the "Galaxy". We can mount the door operator and tracks hidden under the platform which opens the top of the car for unlimited possibilities. Our design, with the use of an electric linear door operator, will provide a very smooth operation. We can provide this unique system for single slide, center opening, two speed and two speed center opening for flat and curved doors.

**Section thru car and hall doors**

We utilize a (½) horsepower linear door operator with a programmable board that has a handheld device for programming and adjustment. This can be accomplished by using the handheld controller and programming the doors from the hallway.

**Round under platform door operator in shop**

**Round under door operator in job site**

**Round hall door tracks with cover**

**Under platform under door operator assembly in our factory**

**Under platform hall door operator assembly on job site**

**We have designed and fabricated doors utilizing the “Galaxy” under platform door operator for entrances as small as 2’- 8”W x 6’- 8”H up to 21’- 0”W x 16’- 0”H clear openings. There are no limits to the size or type of opening. These are the actual sizes we have successfully completed so far.**
